## DETAILED ACTION

### ***Allowable Subject Matter***

Claims 3-12 is allowed

1. The following is an examiner's statement of reasons for allowance: Prior shows a resolver stator coil having a plurality of winding portions each wound around a magnetic pole via ring-shaped insulation caps, the stator coil being impregnated with a liquid or melted resin and fixed to the magnetic pole wherein, the resin is softer than an epoxy. However, Prior art fails to show a revolver stator having a peripheral part of one of the ring-shaped insulation caps provided with a plurality of terminals. Prior art also fails to show, the wire ends of the stator coil each would around one of the plurality of terminals such that each wire end and the terminal form a winding-connecting part, and the wire end and terminal are fixed to each other by soldering at one portion of the winding-connecting part such that the wire end disposed in the remaining portion of the winding-connecting part is formed as a free wire end.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
